SPH SEMINAR SERIES

Managing the Health Risks of Climate Change

Kristie L. Ebi is Director of the Center for Health and the Global Environment, and a Professor in the Departments of Global Health and of Environmental and Occupational Health Sciences, University of Washington. She conducts research on the health risks of climate change, including from extreme events, thermal stress, foodborne and waterborne safety and security, and vectorborne diseases. She has worked on understanding vulnerability and designing adaptation options to increase resilience in multi-stressor environments in Central America, Europe, Africa, Asia, the Pacific, and the US. She co-chairs the International Committee On New Integrated Climate change assessment Scenarios (ICONICS), facilitating developing new climate change scenarios.

Date: Friday 29th September
Time: 1-2pm
Room: 113
Location: Public Health Building, Herston
